

# Sample download from a browser

## with UNIFACE le 17 MAY 2017

This sample can be improved, find all source in zip file

Uniface 9.7.03 used.

The screenshot shows a web browser window with the address bar displaying `https://herve-pichon.fr/poc/wrd_boot/DISPLAY_DOWNLOAD`. The page content includes a table with four columns: UNIFACE DOWNLOAD PDF, UNIFACE DOWNLOAD ZIP, HTML DOWNLOAD PDF, and HTML DOWNLOAD ZIP. Below the table, there is a list of components and instructions for testing the download process.

UNIFACE DOWNLOAD PDF	UNIFACE DOWNLOAD ZIP	HTML DOWNLOAD PDF	HTML DOWNLOAD ZIP
<a href="#">hp_download.pdf</a>	<a href="#">hp_download.zip</a>	<a href="#">Load PDF file</a>	<a href="#">load zip file</a>

-Document is in hp\_download.zip

-Source Uniface are in hp\_download.zip

hp\_download.xml have 3 components Uniface

- `display_download.dsp` (web display download)
- `download.dsp` (web download)
- `frm_htmldownload.frm` (frm with htmlwidget + uhttp)

TEST with idf.exe on internet with html widget + uhttp (support binary since Uniface 9.6.07)

- 1) idf /imp hp\_download.xml
- 2) idf /all
- 3) idf /tst frm\_htmldownload

TEST with browser on internet

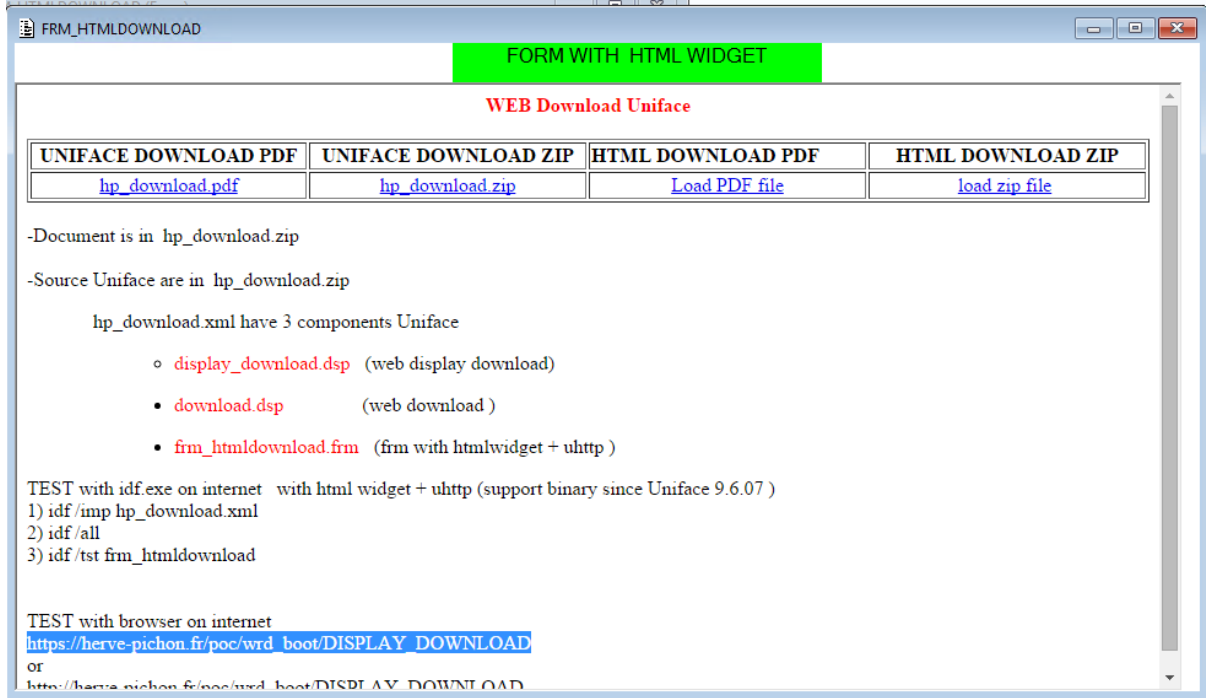

`https://herve-pichon.fr/poc/wrd_boot/DISPLAY_DOWNLOAD`  
or  
`http://herve-pichon.fr/poc/wrd_boot/DISPLAY_DOWNLOAD`

# Sample download from a form with HTML5 WIDGET

## UNIFACE le 17 MAY 2017

The page server was updated with javascript to use uhttp component to do the final download from html widget.

Component UHTTP support binary since Uniface 9.6.07

The screenshot shows a web browser window with the title 'FRM\_HTMLDOWNLOAD'. The main content area has a green header 'FORM WITH HTML WIDGET' and a red sub-header 'WEB Download Uniface'. Below this is a table with four columns: 'UNIFACE DOWNLOAD PDF', 'UNIFACE DOWNLOAD ZIP', 'HTML DOWNLOAD PDF', and 'HTML DOWNLOAD ZIP'. Each column contains a blue hyperlink: 'hp\_download.pdf', 'hp\_download.zip', 'Load PDF file', and 'load zip file' respectively.

Below the table, the text reads: '-Document is in hp\_download.zip' and '-Source Uniface are in hp\_download.zip'. It then lists components from 'hp\_download.xml':

- **display\_download.dsp** (web display download)
- **download.dsp** (web download)
- **frm\_htmldownload.frm** (frm with htmlwidget + uhttp)

TEST with idf.exe on internet with html widget + uhttp (support binary since Uniface 9.6.07)

- 1) idf /imp hp\_download.xml
- 2) idf /all
- 3) idf /tst frm\_htmldownload
